PROFILE

Enterprise-level Solutions Architect with more than 6 years of experience in designing, implementing, and optimizing complete digital ecosystems. I have grown into the role of a full-stack developer with a strong focus on architecture and DevOps, enabling me to clearly integrate frontend, backend, and infrastructure layers to build scalable, efficient, and highly maintainable solutions.

I specialize in building robust, high-performance applications for web and mobile environments. I have solid experience with modern frontend frameworks (React, Angular, Vue.js), backend development (Node.js, NestJS, Spring Boot, .NET, PHP Laravel), and database management (MongoDB, MySQL, SQL Server, Firebase). I also have experience designing and implementing APIs using REST, SOAP, and GraphQL.

In the DevOps domain, I have worked with automation and continuous delivery practices, including containerization (Docker, Kubernetes), CI/CD (GitLab Runners, GitHub Actions, Bitbucket Pipelines), and cloud services (AWS S3/EC2, Azure Container Registry). This combination of skills allows me to design scalable architectures aligned with both technical and business goals.

EXPERIENCE SKILLS

2024

FullStack Developer (8 months)

Tecon

Engineered critical integration system for Puerto Antioquia (Colombian National Port) using NestJS backend architecture. Implemented multi-protocol communication (FTP, SOAP, RESTful APIs) connecting national entities with port's core infrastructure. Developed responsive VUE.js frontend with advanced visualization dashboards, comprehensive logging, and secure authentication. Designed MongoDB database schema optimized for high-volume maritime operations.

2022

FullStack Developer (2 years)

Techtivo (With MunayTech)

Architected and maintained interactive web applications using React JS with Redux state management. Implemented RESTful API communication protocols through NestJS middleware. Administered WordPress platforms, ensuring seamless content management and system performance.

2020

FullStack Developer (4 years)

MunayTech

Developed and maintained interactive web applications utilizing Angular with Redux state management. Implemented scalable backend solutions with NodeJS and RESTful APIs, integrating PHP middleware and Google Firebase for robust data management.

2018

FullStack Developer (2 years)

Eter Software

Engineered enterprise fleet maintenance systems using Angular, NodeJS, and SpringBoot with RESTful APIs. Designed and administered MySQL and Firebase databases, optimizing performance for truck and heavy machinery monitoring applications.

Additional professional experience available on Web.

LEVEL ACADEMIC

2020

Electronic Engineer
Universidad ECCI - Bogotá DC

COURSES

2025

DevOps Integral Docker, Kubernetes, Jenkins
Udemy - Virtual (16,5 h)

2023

React from Zero
Udemy - Virtual (37,5 h)

2022

Redux on Angular with NGRX
Udemy - Virtual (12,5 h)

2021

Mision TIC 2021 - Multiplatform Development
Universidad Del Norte - Barranquilla (800 h)

2021

Become an Angular developer
LinkedIn - Virtual (21 h)

FRAMEWORKS AND TECHNOLOGIES

React (4 years)

spring (3 years)
